About

Passionate Software Developer with extensive experience in full-stack development.
Seeking to leverage my expertise in JavaScript, TypeScript, and React to contribute to innovative projects.

Experience

Pura Vida, Mobile Developer 2023 – present | Remote, Spain

Pura Vida is an App that allows festival-goers to find their way in a summer festival and create their own agenda of activities.

- Simplified the app's design using React Native, aligning it with the festival's branding, enhancing user experience.
- Currently collaborating on backend for organizers, focusing on intuitive UI with Next.js and Tailwind CSS.

CADO, Full Stack Developer 2023 – 2024 | Remote, Spain

CADO is a Mobile web application helping pet owners to find pet sitters, and pet sitters to manage pet stays and send updates

- Key contributor in a 5-member team, focusing on frontend development of a pet-sitting platform with React and Next.js.
- Led the UI styling with Tailwind CSS, ensuring consistency with prototypes from Figma, enhancing user engagement.

Apocalypse Engine Room, Software Engineer 2023 – 2024 | Remote, Spain

Apocalypse Engine Room is a web app for Role-Playing Games enthusiasts

- Collaborated in a 2 developer team to do a complete JavaScript to TypeScript conversion of +20 React and Express components and refactored code to be type safe
- Refactored backend code to make it easily testable, modular and to improve readability. Implemented unit tests using Jest and React Testing Library

UniCharts, Blockchain Developer 2022 – 2023 | Remote, Lithuania

Charting App showing price data from Uniswap V3 pools

- Developed a charting application using React and Redux, translating complex data into user-friendly interfaces.

YOGI TIMES, Frontend Developer and SEO Specialist in online Yoga magazine 2022 – 2022 | Canggu, Indonesia

- Improved website performance and user experience by refining CSS styling, applying UI/UX principles.

Delta Radar, Blockchain Developer 2021 – 2022 | Remote, Lithuania

App that finds arbitrage trades in ETH & BSC blockchains

- Implemented frontend for a blockchain-based app with React.js, highlighting skills in developing responsive web apps.

Stadler Rail, Installations Engineer in reputed company in the railway sector 2019 – 2020 | Valencia, Spain

- Supervised external consultancies to meet technical requirements, design quality assurance and deadlines
- Assisted product owners in meeting customer's demands

NSTM, Mechanical Engineer in Dutch national railways operator 2016 – 2018 | Haarlem, The Netherlands

- Integrated mechanical systems to upgrade legacy vehicles and improve safety characteristics.

Decnika, Engineering Business Developer 2013 – 2016 | Valencia, Spain

- Sought and secured valuable assignments, negotiated with clients and lead structural analysis team

Education

Software Engineering, Codeworks

Fullstack Open Course, University of Helsinki 

Industrial Engineering, Universidad Politécnica de Valencia
